## **New Product**

### **ASGC maps for edition 2.1 (1991)**

**Hardcopy maps for the Main Structure of the ASGC  
(ie State and Territory/SD/SSD/SLA) are now available.  
*Please see sample map overleaf.***

**These maps are produced by  
the Area Classification subsection  
which also produces the *ASGC Manual*.**

**There are 14 maps in the complete set.  
They are in A3 format and in two colours (black and red).**

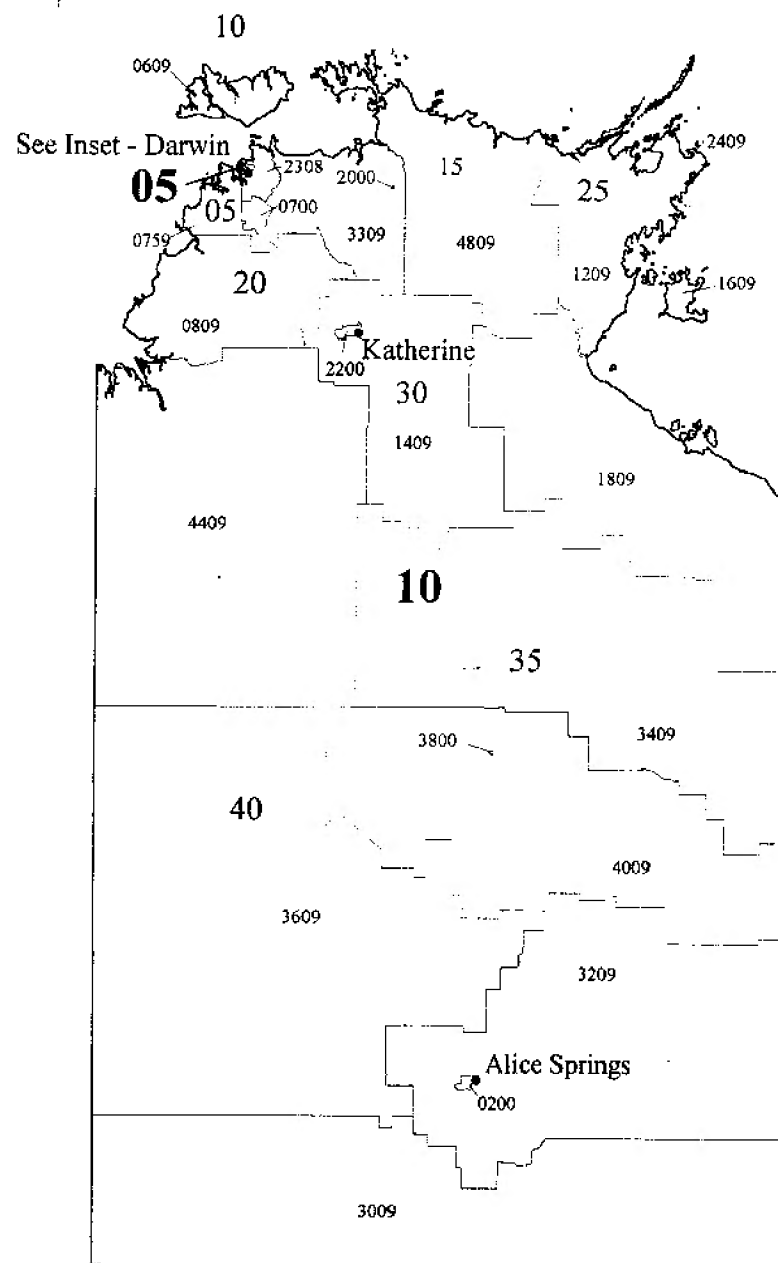

**There is one main map for each State and Territory and  
one or two enlargement maps for the larger States.  
Insets are used in all maps.**

**ASGC codes are shown on the maps and  
a full list of ASGC codes and ASGC names is printed  
at the back of each map for easy reference.**

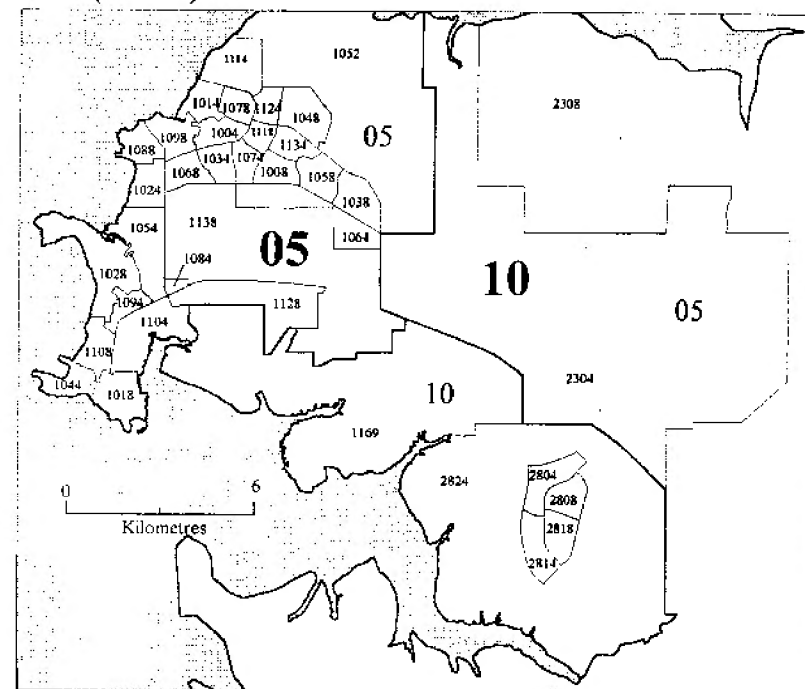

**To obtain these maps please enquire at your nearest ABS bookshop:**

# AUSTRALIAN STANDARD GEOGRAPHICAL CLASSIFICATION (ASGC)

## ASGC AMENDMENT ADVICE NO. 2.1(3)

This Amendment Advice contains ASGC updating instructions, together with new and replacement pages to be included in ASGC Edition 2.3.

Each issue of replacement pages, covered by a particular Amendment Advice, creates, in effect, a new edition of the ASGC, which is identified by an edition number and the effective date of replacement pages. Appendix 1 specifies the content (and effective date) of each edition, while Appendix 2 specifies the spatial unit changes between editions.

This set of pages will update ASGC edition 2.3 to edition 2.4 status.

### UPDATING INSTRUCTIONS

Remove existing pages	Insert replacement/ new pages	Remove existing pages	Insert replacement/ new pages
Title page v - vi	Title page v - vi	<u>APPENDIX 3:</u>	
		-	7 - 8
<u>CHAPTERS 1 - 6:</u>		<u>APPENDIX 4:</u>	
21 - 24	21 - 24		
39 - 40	39 - 40	-	-
43 - 46	43 - 46		
55 - 74	55 - 74		
79 - 82	79 - 82		
85 - 102	85 - 102		
109 - 126	109 - 126		
<u>APPENDIX 1:</u>			
-	7 - 8		
<u>APPENDIX 2:</u>			
53 - 54	53 - 65		

**NOTE:** It is advisable to retain the removed pages for future reference (eg under cover of this sheet in the back of the ASGC manual) for a few years.

**The reason:** ABS statistical publications are likely to quote the relevant ASGC edition used which can vary between publications and will vary over time. Accordingly, there may be occasions when users may wish to refer to ASGC pages relevant to previous editions.

## **PREFACE**

The Australian Standard Geographical Classification (ASGC) has been prepared by the Australian Bureau of Statistics (ABS) for use in the collection, compilation and publication of its statistics. The ABS encourages other organisations to use this Classification in their own statistical work in order to improve the comparability and usefulness of statistics generally.

The ASGC is updated on an annual basis by the issue of replacement pages which have a date of effect of 1 July each year. Each issue of replacement pages creates a new edition of the ASGC which is identified by an edition number and effective date of replacement pages. The composition of each edition and the changes to ASGC spatial units between editions are specified in Appendixes 1 and 2 respectively.

Any inquiries about the Classification, or suggestions for changes, should be directed to the Assistant Director, Area Classification, ABS, P.O. Box 10, BELCONNEN, ACT 2616.

**IAN CASTLES**  
**Australian Statistician**

**September 1994**

## ABBREVIATIONS

The following abbreviations are used in this Manual:

### Spatial Unit Type

CD	— Census Collection District
Legal LGA	— Legal Local Government Area
MSR	— Major Statistical Region
S/T	— State/Territory
SD	— Statistical Division
S Dist.	— Statistical District
SLA	— Statistical Local Area
SR	— Statistical Region
SRS	— Statistical Region Sector
SSD	— Statistical Subdivision
UC/L	— Urban Centre/Locality

### Legal LGA Type

(A)	— NSW Local Government Area (excluding Cities)
(B)	— Borough
(C)	— City
(CGC)	— Community Government Council
(DC)	— District Council
(M)	— Municipality
(S)	— Shire
(RC)	— Rural City
(T)	— Town

### States/Territories

NSW	— New South Wales
VIC	— Victoria
QLD	— Queensland
SA	— South Australia
WA	— Western Australia
TAS	— Tasmania
NT	— Northern Territory
ACT	— Australian Capital Territory
OT	— Other Territories

### Miscellaneous

Bal	— Balance
BSD	— Brisbane Statistical Division
excl.	— excluding
Gr.	— Greater
incl.	— including
Mt C'tha	— Mount Coot-tha
Pt	— Part
Res.	— Reservoir
S'saye	— Strathfieldsaye

- (i) In OTHER TERRITORIES, the SD has been delimited to represent the aggregated area of Jervis Bay Territory, and the Indian Ocean Territories of Christmas Island and Cocos (Keeling) Islands.

### **State/Territory (S/T)**

19. The State/Territory is the largest type of spatial unit in the ASGC. There are six States and five Territories recognised in the ASGC as being within Australia, viz New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, Northern Territory, Australian Capital Territory, Jervis Bay Territory and the external Territories of Christmas Island and Cocos (Keeling) Islands. They are political entities with fixed boundaries and, with the exception of the last three mentioned territories, the total area of each (including their off-shore islands) is used for statistical purposes as a separate spatial unit in the ASGC. Jervis Bay Territory and the Territories of Christmas Island and Cocos (Keeling) Islands are included as one spatial unit at the S/T level, ie 'Other Territories'.

### **Statistical District (S Dist.)**

20. In a broad sense Statistical Districts are the more important, predominantly urban areas of Australia outside Capital City Statistical Divisions. There are at present 21 Statistical Districts in Australia and each is composed of one or more Statistical Subdivisions. Whilst the majority are contained wholly within one State/Territory, Statistical Districts can and, in three instances, actually do cross State/Territory boundaries.

21. The criteria for delimiting Statistical Districts are the same as for Capital City Statistical Divisions described in paragraph 17(a), but apply to population clusters (ie an urban centre, or two or more urban centres in close proximity) with a population of 25,000 or more. As with State Capital City Statistical Divisions, the boundary of a Statistical District should contain the anticipated urban development of the centre for a period of at least twenty years and can cut across Legal LGAs which consist of urban and rural parts - see paragraph 31 below for urban centre criteria. A Statistical District may also be delimited in the case of an urban centre with less than 25,000 population where the ABS determines that there is a demand for intercensal population estimates for the area and that existing Legal LGA or SLA boundaries are obviously inadequate for this purpose.

### **Legal Local Government Area (Legal LGA)**

22. The Legal Local Government Area is a type of spatial unit which represents the whole undivided geographical area of responsibility of either:

- an incorporated Local Government Council, or
- an incorporated Community Government Council (CGC) where the CGC is of sufficient size and statistical significance.

Currently only Coomalie in the Northern Territory has met the criteria in respect of CGCs. There are approximately 790 Legal LGAs in Australia which collectively cover only a part of Australia. (The major areas not covered by Legal LGAs are the large northern parts of South Australia, most of the Northern Territory and all of the Australian Capital Territory.)

23. The number of Legal LGAs and their boundaries vary over time. Their creation and delimitation is the responsibility of the respective State/Territory Governments and is governed by the provision of the Local Government Acts within the particular State/Territory.

24. The various types of Legal LGAs in each State and the Northern Territory are:

- NEW SOUTH WALES: Cities\*, Municipalities and Shires
- VICTORIA: Cities, Rural Cities, Towns, Boroughs and Shires
- QUEENSLAND: Cities, Towns and Shires
- SOUTH AUSTRALIA: Cities\*, Municipalities and District Councils
- WESTERN AUSTRALIA: Cities, Towns and Shires
- TASMANIA: Cities\* and Municipalities
- NORTHERN TERRITORY: Cities, Towns, Shires and CGCs.

(NOTE: \* Municipalities proclaimed as Cities)

#### **Statistical Region Sector (SRS)**

25. Statistical Region Sectors cover, in aggregate, the whole of Australia without gaps or overlaps and consist of one or more SLAs although, in practice, most SRSs (ie all those outside Brisbane and Moreton SDs) can be expressed in terms of one or more adjoining SSDs. Further, most SRSs equate with Statistical Regions (SRs). Those SRSs which are subdivisions of SRs are used primarily for the production and presentation of selected population census and labour force statistics. Some of these SRSs are also used to present a wider range of statistics according to regional features, eg the Brisbane City rings and sectors, which could not be incorporated in ASGC Main structure spatial units.

#### **Statistical Region (SR)**

26. Statistical Regions consist of one or more SRSs and cover, in aggregate, the whole of Australia without gaps or overlaps. They were designed as sufficiently large regional type spatial units suitable for the presentation of population census statistics standard output. The minimum population size of such regions is approximately 147,000.

27. Statistical Regions are also used as the basis for the dissemination of regional labour force statistics. The minimum size of regions for this purpose however is dependent on Labour Force Survey sample sizes for each State. In New South Wales and Victoria the minimum population size is 250,000 although it is less in other States. It is therefore sometimes necessary in the dissemination of labour force statistics either to aggregate Statistical Regions into larger spatial units or to use subdivisions of Statistical Regions, ie SRSs.

### Major Statistical Region (MSR)

28. Major Statistical Regions consist of one or more SRs and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries and serve the same purpose as Statistical Regions, though at a broader spatial level (ie Capital City SD versus Balance of State). However, in Tasmania, Northern Territory, Australian Capital Territory, and 'Other Territories', population size limitations mean that the State/Territory cannot be dissected into two MSRs. In these instances, the State/Territory each equates with one MSR.

### Urban Centre/Locality (UC/L)

29. Broadly an Urban Centre is a population cluster of 1,000 or more people. A Locality is a population cluster of between 200 to 999 people. People living in Urban Centres are classified as urban for statistical purposes while those in Localities are classified as rural. Each Urban Centre and Locality is bounded (ie a boundary for it is clearly defined) and composed of one or more whole Census Collection Districts (CDs). UC/Ls are defined for each population census and are current only at census time.

30. The criteria for delimiting or bounding Urban Centres and Localities are based on those developed in 1965 by Dr G.J.R. Linge of the Australian National University. The criteria as currently in force, ie as adopted and subsequently amended by the Conference of Statisticians of Australia in 1965 and 1969 and the Review of ABS Statistical Geography of 1988, are set out below.

31. Each *URBAN CENTRE WITH A POPULATION OF 25,000 OR MORE* is to consist of a cluster of contiguous urban CDs and other urban areas. CDs and other areas classified as urban include the following:

- (a) All contiguous CDs which have a population density of 200 or more persons per square kilometre shall be classified as urban. Consequently State, Statistical Division, Legal LGA and other administrative boundaries shall be disregarded in determining whether a CD should be included within the urban centre.
- (b) A CD consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with CDs which are themselves urban.
- (c) Any CD which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by CDs which are themselves urban.
- (d) Any area which is completely surrounded by CDs which are urban must itself be classified as urban.
- (e) Where an Urban Centre of 25,000 or more population is separated from another urban area by a gap in actual development of less than three kilometres (by the shortest railway station or road distance), the gap shall be bridged by classifying a connecting CD as urban, and therefore treating the urban areas as one. If the gap is three or more kilometres (and whether or not it consists mainly of reserved land or a natural barrier)

the urban areas shall remain separate. (Dr Linge recommended that the outlying urban area should have a population of at least 1,000.)

- (f) Any area included in an urban centre in 1971 or thereafter under the provisions of these criteria shall continue to be so included, unless the population of the urban centre falls below 25,000, in which case these criteria will cease to apply.
- (g) If a CD were incorrectly included (for whatever reason) in a Linge area at a previous Census, then it should be excluded at the next Census unless it now meets the criteria.
- (h) Large peripheral CDs in growth areas shall be fragmented; and insofar as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible, contain at least 100 persons at the next Census and be of such a size that they will contain a collector's workload when fully developed. For the purpose of delimiting Urban Centres such fragments shall be regarded as CDs.

32. Each *URBAN CENTRE WITH A POPULATION OF BETWEEN 1,000 AND 24,999* is to be delimited as follows:

- (a) The Urban Centre shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available) - guidelines for this purpose are described in paragraph 36 below.
- (b) All contiguous urban growth is to be included (which, in small urban areas, would not necessarily occur if the density criterion was applied), together with any close but non-contiguous development which could be clearly regarded as part of the urban centre. However, cognizance shall be taken of the criteria outlined in paragraph 31 above particularly in urban centres which contain a population of between 20,000 and 24,999.

33. *LOCALITIES* are to be delimited as follows:

- (a) All population clusters of less than 1,000 population and whose population is expected to reach 200 by the next census are to be examined as regards the drawing of a boundary around the area encompassing the cluster.
- (b) The following criteria must be satisfied before a boundary is drawn around a Locality. It must:
  - contain a non-farm population of at least 200 people but not more than 999 by the next Census;
  - have a minimum of 40 occupied non-farm dwellings with a discernible urban street pattern; and
  - have a discernible nucleus of population.
- (c) If there is some doubt that a Locality will reach the minimum population of 200 people then a boundary should still be drawn around the Locality.

- *Listing of Australian Standard Geographical Classification (ASGC) Labels and Codes*

These listings are available for all structures and all editions of the ASGC.

- *National Localities Index (NLI)*

This Index has been designed as a comprehensive general purpose coding aid for assigning postcodes and ASGC codes (ie S/T, SD, SSD and SLA) to addresses and/or localities within Australia.

For NLI purposes the definition of 'locality' is intentionally broad to ensure that the Index is comprehensive. A 'locality' has therefore been defined as a place where people do, or may possibly, reside or conduct a business.

This Index is available by State and Territory or for the whole of Australia. It can be supplied with or without street data. Street data is necessary if there is a requirement to code all addresses, including those in localities that are split between two or more SLAs. The effective date of the first version of the NLI is 1 January 1991 and it is being updated regularly in line with ASGC editions.

- *Customised Concordances*

Concordances between ASGC spatial units, postcodes and other geographical units can be tailored to the individual user's special requirements.

For further information on any of these products you should contact the Assistant Director, Area Classification, Australian Bureau of Statistics, Canberra — telephone (06) 252 5888 or facsimile (06) 252 7788.

## CHAPTER 6 : THE CLASSIFICATION

### Summary

This chapter presents the current ASGC structures in their full detail.

2. The currently applicable ASGC structures presented in this chapter are:

- **MAIN STRUCTURE.** This is presented in two versions:
  - BROAD MAIN STRUCTURE (ie down to the SSD level)
  - DETAILED MAIN STRUCTURE (ie down to the SLA level).
- **STATISTICAL DISTRICT STRUCTURE.**
- **LEGAL LGA STRUCTURE.**

In this structure, which is more commonly referred to as the ALPHABETIC LIST OF LEGAL LGAs AND STATISTICAL LOCAL AREAS WITHIN STATES/TERRITORIES, Legal LGAs are ordered alphabetically within States/Territories, and Statistical Local Areas (SLAs) are ordered alphabetically within Legal LGAs.

- **STATISTICAL REGION STRUCTURE.** This is presented in two versions:
  - BROAD STATISTICAL REGION STRUCTURE (ie down to the SR level)
  - DETAILED STATISTICAL REGION STRUCTURE (ie down to the SLA level).

### Number of ASGC Spatial Units

3. The number of ASGC spatial units (ie categories) in these structures as at 1 July 1994 is set out below.

<i>Spatial unit</i>	<i>NSW</i>	<i>VIC</i>	<i>QLD</i>	<i>SA</i>	<i>WA</i>	<i>TAS</i>	<i>NT</i>	<i>ACT</i>	<i>OT</i>	<i>AUST</i>
States/Territories	1	1	1	1	1	1	1	1	1	9
Statistical Divisions	13	12	12	8	10	5	3	2	1	66

AUSTRALIAN STANDARD GEOGRAPHICAL CLASSIFICATION  
APPENDIX 2: SPATIAL UNIT CHANGES BETWEEN ASGC EDITIONS

53

EDITION 2.2 ASGC SPATIAL UNITS	EDITION 2.3 ASGC SPATIAL UNITS	COMMENTS ON CHANGES
<b>OTHER TERRITORIES</b>		
From 1 July 1993, the external territories of Christmas Island and Cocos (Keeling) Islands are within the scope of the ASGC and are included in the new State/Territory category 'OTHER TERRITORIES'. Also included in 'OTHER TERRITORIES' is Jervis Bay Territory which until 30 June 1993 was included in the Australian Capital Territory for State/Territory statistics. The spatial unit codes to apply from 1 July 1993 are listed below.

## PART 12: CHANGES BETWEEN ASGC EDITIONS 2.3 AND 2.4

All statistically significant changes are listed below, including changes in ASGC code numbers only. Minor spatial unit changes involving no changes in ASGC spatial unit codes are not listed. These include spatial unit boundary changes which involve no significant transfers of households or economic units from one spatial unit to another. However, known changes of this type are recorded and information about them can be obtained on request.

Spatial unit splits/amalgamations are indicated by 'link' lines in the table of changes below.

### NEW SOUTH WALES

#### Legal Local Government Areas (and Statistical Local Areas)

In New South Wales, the *Local Government Act 1993 No. 30* introduced on 1 July 1993 provided that all local government areas would be constituted as 'areas' with a council being constituted to manage each 'area'.

Under the provisions of that Act, an area may be proclaimed as a city. There is no provision for the constitution of areas as shires or municipalities.

As a result, all LGAs/SLAs in New South Wales which were previously shires or municipalities, are now areas. In the ASGC, this is reflected in the LGA/SLA name by the new abbreviation (A), in lieu of the previous (S) or (M).

LGA/SLA CODE	NAME	LGA/SLA CODE	NAME	
7150	Sutherland (S)	7150	Sutherland Shire (A)	Renamed. (The NSW Government gazetted date of effect was 30 June 1993.)
1550	Canterbury (M)	1550	Canterbury (C)	Proclaimed a City. (The NSW Government gazetted date of effect was 10 November 1993.)

### VICTORIA

#### Statistical Subdivisions

SSD CODE	NAME	SSD CODE	NAME	
05 (SD 05)	Central Melbourne	05	Central Melbourne	Boundary change. An area was transferred from Melbourne (C) - Remainder to Essendon (C) and an area was also transferred from Essendon (C) to Melbourne (C) - Remainder. Overall area reduced.
10 (SD 05)	Western Inner Melbourne	10	Western Inner Melbourne	

Boundary change. Overall area enlarged. See comments above.

	CGC-STAT-REGION-SECTORS-JUL94	01.07.94	4	
	CGC-SLA-IN-STAT-REGIONS-JUL94	01.07.94	5	
	CGC-REGION-STRUCTURE-T-JUL94	01.07.94	1-5	Contains totalling of SLAs at levels 1, 2, 3 and 4.

AUSTRALIAN STANDARD GEOGRAPHICAL CLASSIFICATION  
APPENDIX 3: ASGC DESCRIPTOR SETS HELD ON THE ABS CLASSIFICATION SYSTEM

8

<i>DD Classification Name</i>	<i>Descriptor Set Output Selector Name</i>	<i>Effective Date</i>	<i>Level No.</i>	<i>Comments</i>
<b>ASGC EDITION 2.4</b>				
<b><u>HYBRID CLASSIFICATIONS (a)</u></b>				
ASGC-MAIN-STRUCTURE-TOTAL	CGC-STATDIV-SUBDIV-TOTAL-JUL94	01.07.94	1-3	Source classification is ASGC-DETAILED-MAIN-STRUCTURE. Contains label for Australia. Selects levels 1, 2 and 3 with totalling of SSDs at levels 1 and 2 and for Australia.
ASGC-AGRIC-DXSIZE	CGC-ASGC-ACCES-DXSIZE-JUL94	01.07.94	1-4	Source classification is ASGC-DETAILED-MAIN-STRUCTURE. Totalling of SLAs at levels 1, 2 and 3 and a total for Australia. ASGC codes and names on medium labels. Other Territories excluded.
ASGC-AGRIC-DXSLA	CGC-ASGC-ACCES-DXSLA-JUL94	01.07.94	1-4	Source classification is ASGC-DETAILED-MAIN-STRUCTURE. Includes label for Australia and ASGC codes and names on medium labels. No totalling at any level. Other Territories excluded.
ASGC-BLDG-LGA-T	CGC-LGA-TOTAL-JUL94	01.07.94	1-2	Source classification is ALPHA-LIST-OF-LGA-SLA-BY-STATE. Provides labels for Legal LGAs within each S/T. Contains Incorporated Areas, Unincorporated Areas and State totals for each S/T and a total for Australia. (Totals at level 2 where the Legal LGA is an aggregate of SLAs are based on a 5-digit (State/SLA) code.) Other Territories excluded.

NOTE: A time-stamped DD-New-Initial-Value file ASGC-ASLA-RECODES is available to convert 5-digit SLA codes to 9-digit SLA codes.

(a) Hybrid classifications consist of a set of variation commands which are applied to a source classification to produce a modified version of that classification.
